

HEALTHMEDIC RESEARCH

Provides study and testing services for safety evaluation of industrial and consumer products including cosmetics and skincare, medical and dental devices, chemicals, herbal products, and biomaterials. We have competent expertise in the safety assessment of cosmetic products. We apply national and international standard protocols based on the ISO 10993, MS, ASTM testing regimes. We also provide advisory services on the relevant tests and test methods. Contract research and testing also form part of our service to the industry.

Human studies and clinical testing, safety and efficacy evaluations are done at various academic institution and at our testing center headoffice, located in Bandar Sri Permaisuri, Cheras

Besides conducting biocompatibility evaluation, we also offer a range of screening tests for products which are at R & D or pre-release stage. A close contact between sponsors and our study directors and consultants is essential so that possible modifications to the development process can be executed.

We also provide specialised skin care, visit our skin clinic at
